

Batch file: Automate Chkdsk and Defrag on WinXP machines

This batch file can save you some time by automatically running Chkdsk and Defrag on your Windows XP machines. First, it does a read-only Chkdsk. If Chkdsk sets the errorlevel to 3, meaning that it found errors and needs to be run with the /F (fix) option, the file checks to see whether the systemroot or pagefile exist on the drive. If so, it runs Chkdsk the next time the system is rebooted. If systemroot or pagefile don't exist on the drive, it runs a Chkdsk /F /R now, and then it runs a Defrag -b and a regular Defrag. (The -b switch is an undocumented switch that optimizes the drive for boot.)

Using the file

To put the file to work, follow these steps:

1. Copy the code in Listing A.
2. Open Notepad and paste in the code.
3. Save the file as Dskchk.cmd.
4. Create DrvLtr.txt and list the letters of the drives you want checked, with each letter on its own line. Under the last drive letter, type the word *end*. For example:

```
C:  
F:  
end
```

5. Put Dskchk.cmd and DrvLtr.txt in the same directory. You can then schedule Dskchk with Task Scheduler or run it manually.

Listing A

```
REM chkdsk and defrag automation  
for /F "eol= tokens=1 delims=( " %%i in (DrvLtr.txt) do set DrvLtr=%%i& call :dsKchk  
  
:dsKchk  
If %DrvLtr% == end goto :eof  
chkdsk %DrvLtr%  
If not errorlevel 3 goto :defrag  
If not exist %DrvLtr%\winnt If not exist %DrvLtr%\windows If not exist %DrvLtr%\pagefile.sys  
goto :dskchkon  
  
:dskchkoff  
cd\  
%DrvLtr%  
echo Y chkdsk /F /R  
goto :defrag  
  
:dskchkon  
chkdsk %DrvLtr% /F /R  
  
:defrag  
cd\  
%DrvLtr%  
defrag %DrvLtr% -b  
defrag %DrvLtr%  
:EOF
```

TechRepublic communities engage IT professionals in the ultimate peer-to-peer experience, providing actionable information, tools, and services to help members get their jobs done. TechRepublic serves the needs of the professionals representing all segments of the IT industry, offering information and tools for IT decision support and professional advice by job function.

CIO Republic: Get analysis and insight on e-business, leadership, executive careers, business strategy, and technology.

IT Manager Republic: Access technology insights, project and personnel management tips, and training resources.

NetAdmin Republic: Get tips on Windows, NetWare and Linux/UNIX administration, infrastructure design, and network security.

Support Republic: Obtain detailed solutions to desktop hardware, software, and end-user support problems.

IT Consultant Republic: Find information and advice on client and vendor relations, project management, and technology.

TechRepublic site features

Free e-newsletters: Keep up-to-date on any aspect of the IT industry with e-newsletters—from tech stocks to daily software tips, from IT careers to hot trends—delivered right to your e-mail Inbox.

Free downloads: We've collected resources to make your job easier, including ready-to-use IT forms and templates, checklists, tools, executables, Gartner product analyses, and white papers.

TechRepublic's books and CDs: Find the latest books and CDs about today's critical IT topics, including PC troubleshooting, VPN, TCP/IP, Windows client and server issues, and Cisco administration.

Discussion center: Open a discussion thread on any article or column or jump into preselected topics: career, technology, management, and miscellaneous. The fully searchable Discussion Center brings you the hottest discussions and threads and allows you to sort them by topic and by republic.

Try our premium subscription product, TechProGuild, free for 30 days. Our online IT community provides real-world solutions and the latest articles, resources, and discussions affecting frontline IT pros. Get access to more than 250 full-text IT books, along with exclusive downloads and in-depth articles on network and system administration, PC troubleshooting, help desk and support issues, and more.
